Re: Proposed Additions at John Adams and Woodrow Wilson Middle Schools
For the Edison Township Board of Education
USA Project Nos.: 2022-109, 110

Dear Mr. Allen,

Per your request to Mr. Spasovski, please let this letter serve as my strong letter of recommendation for Pal Pro Builders LLC to assist them in bidding the above referenced project.

I have been a New Jersey public school architect for more than thirty-five years and in all my years in working with general contractors, Pal Pro Builders is one of the finest. They are proactive, professional, and know how to construct a building. Our ten classroom and gymnasium addition, along with other scope of work items including a connecting corridor, kitchen, and main entry security vestibule was a complicated project that needed an expert builder. On top of the complexities was the fact the students occupied the building the entire time. To top it all off was the fact we were in the midst of a pandemic that made this project one of the most difficult in all my years.

Pal Pro Builders worked with the owner and our team to get the job done. They came to every project meeting with a work schedule and plan of attack that got us through. They planned their work and completed it as they projected. I could not have worked with a more professional team.

I strongly urge you to please work with them in your capacity to allow them to bid the next project in Edison. I would be extremely pleased if they won the award.

If you have any questions, or would like to speak with me directly my cell is (908)295-4716.

Thank you.

U.S.A. ARCHITECTS PLANNERS AND INTERIOR DESIGNERS, P.A.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "P. Campisano", written over a horizontal line.
